To SB254Input <SB254Input@calquake.com>

The Executive Order infers that the CA wildfires were started as a result of climate change and extreme conditions. However it was found that someone started the fires.

What is being done to ensure that homeless encampments which are the cause of many fires are removed from our communities. It's not fair for the citizens and state to bear that cost of not managing that problem which is the cause of many fires.
